

My first work in laravel 4.2

1) Index page

2) Main page . show all products

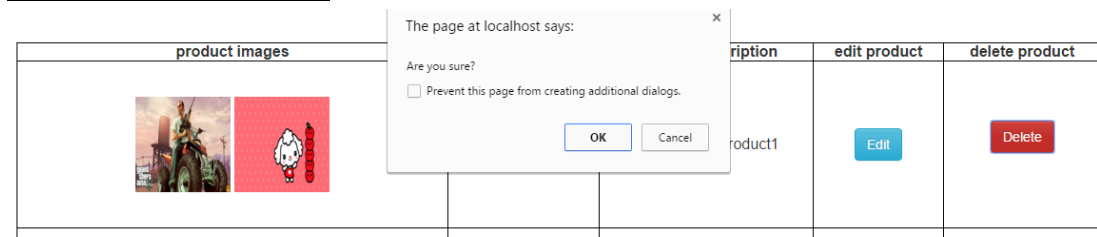

product images	product Name	product description	edit product	delete product
	product1	this desc fro product1	Edit	Delete
	product 2	this is product 2	Edit	Delete

[Add New Product](#)

3) Delete product ,

4) And New Product

localhost/task/public/product/create

⚡ Create New Product!

Name	<input type="text" value="name"/>
Description	<input type="text" value="description"/>
images	<input type="button" value="Choose Files"/> No file chosen
<input type="button" value="Save"/>	

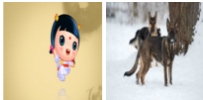

5) Edit product

✎ Edit Product!

Name	<input type="text" value="product1"/>
Description	<input type="text" value="this desc fro product1"/>
images	<input type="button" value="Choose Files"/> No file chosen
<div></div> <input type="button" value="Edit"/>	

6) Pagination

localhost/task/public/product?page=2

product images	product Name	product description	edit product	delete product
	new produc	this is desc for new prodcut	<input type="button" value="Edit"/>	<input type="button" value="Delete"/>
	product	this is product	<input type="button" value="Edit"/>	<input type="button" value="Delete"/>
